

Scorpio LH300

Compatible with ALL cranes & supports

Available configurations:

1. SCORPIO CRANES WITH DYNAMIC COUNTERWEIGHTS SYSTEM

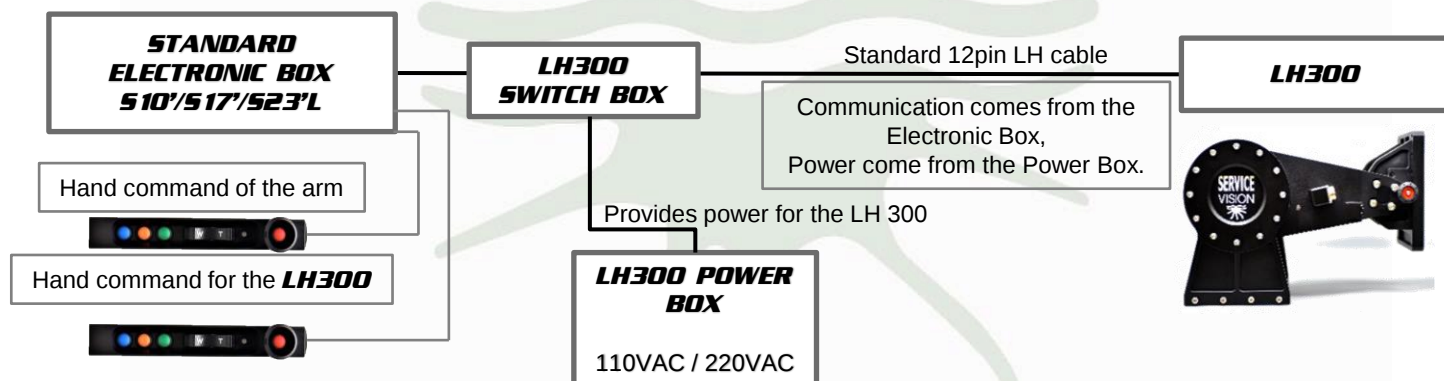

(Scorpio 23' / Scorpio 35' / Scorpio 38' / Scorpio 45' / Scorpio 78')

The **LH300** connects to the existing electronic box of the **Scorpio 23'/35'/38'/45'/78'** with only one cable and doesn't affect the load capacity of each crane. The **LH300** is powered and controlled from the Standard electronic box of the crane and the **Dynamic counterweights system** can compensate the movement of the **LH300** to keep the crane balanced all the time.

2. SCORPIO LIGHT CRANES SERIES

(Scorpio 10' / Scorpio 17' / Scorpio 23'L)

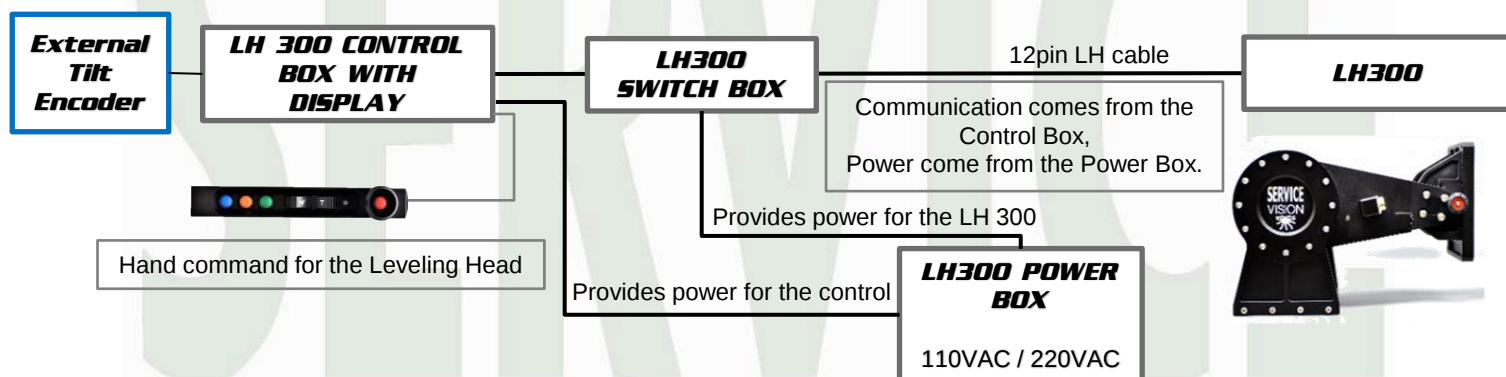

With the **Light Scorpio Cranes 10'/17'/23'L** it is necessary to add the **LH300 Switch Box** and the **LH300 Power Unit** to power the **LH300**. The **LH300** communicates with the Standard electronic box of the crane and offers the same functions than the **Scorpio Cranes** except for the weights compensation using the **Dynamic Counterweights System** because these cranes don't have this system.

Universal Scorpio LH300

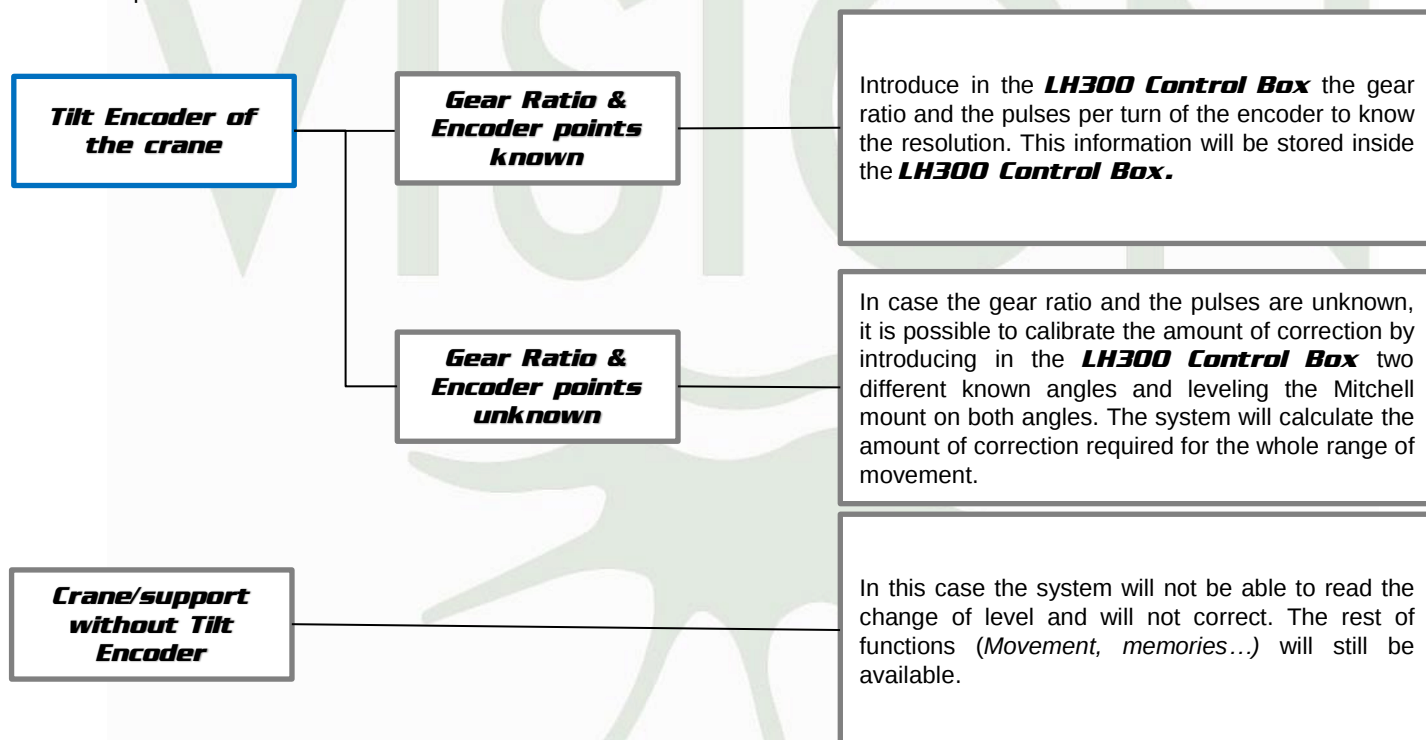

Compatible with ALL cranes & supports

3. OTHER CRANES / SUPPORTS

The **LH300** can be mounted in any crane or support controlled by the **LH300 Control Box** and powered with the **LH300 Power Box**.

In this configuration the leveling head will correct the level using an **External Tilt Encoder** signal (Not from Servicevision). There are three possibilities in this scenario:

Servicevision will provide different mount adaptors for the **LH300** to be mounted in different supports or will offer drawings for customization.
